SUBJECT INDEX

Acrylonitrile
High resolution He I photoelectron spectrum of acrylonitrile 65
Angular distribution
A primer of valence shell photoelectron angular distributions in atoms 117
Anisotropy
Alkaline earth core level photoemission spectroscopy of high temperature superconductors 241
Electronic band structure of high T_c Cu-oxide superconductors: comparison of predictions with experiments 281
The Cu2p X-ray photoelectron core-lines in copper oxide based high temperature superconductors 223
APW
Electronic band structures in cubic perovskite-type oxides: bismuthates and transition metal oxides 303
ARPES
Electronic band structure of high T_c Cu-oxide superconductors: comparison of predictions with experiments 281
Photoemission studies of the Bi–Sr–Ca–Cu–O valence band 359
Photoemission studies of the valence bands in $YBa_2Cu_3O_{7-\delta}$ 321
Arene
Ultraviolet photoelectron spectra of arene chromium tricarbonyls 55
Argon
Autoionization of doubly excited Ar atoms into Ar^{2+} and Ar^+ continuum states 75
Art
ORBITALS (1992)
Auger
The problem with the copper Auger data for the high temperature superconductors 269
Autoionizaiton
Autoionization of doubly excited Ar atoms into Ar^{2+} and Ar^+ continuum states 75

Band structure
Electronic band structures in cubic perovskite-type oxides: bismuthates and transition metal oxides 303
BCS
Photoemission studies of the Bi–Sr–Ca–Cu–O valence band 359
Surface termination of $YBa_2Cu_3O_{7-x}$ systems 453
Bismuthate
Electronic band structures in cubic perovskite-type oxides: bismuthates and transition metal oxides 303
Bromomethane
The complete valence shell photoelectron spectra of CH_3F, CH_3Cl, and CH_3Br using synchrotron radiation at $h\nu = 72$ eV: a comparison with many-body Green's function calculations 83

Cadmium
Surface reactions of NO_2 with machined Zn, Cd, Cu and Ag surfaces studied by He I/II photoelectron spectroscopy 167
Cation
Spectroscopic characterization of cations: from photoelectron spectroscopy to laser and ion-beam methods 15
Chlorine
A study of the reactions of chlorine and fluorine atoms with SiH_2Cl_2 and $SiHCl_3$, with ultraviolet photoelectron spectroscopy 175
Chlorofluorocarbon
High resolution photoelectron spectroscopy of CH_2F_2, CH_2Cl_2 and CF_2Cl_2 using supersonic molecular beams 125
Chloromethane
The complete valence shell photoelectron spectra of CH_3F, CH_3Cl, and CH_3Br using synchrotron radiation at $h\nu = 72$ eV: a comparison with many-body Green's function calculations 83
Chromium compound
A study of valence level photoelectron cross sections for the metallocenes of vanadium, chromium, cobalt and nickel from 20 to 100 eV 101
Chromium tricarbonyl
Ultraviolet photoelectron spectra of arene chromium tricarbonyls 55

Cluster
On the role of the PES data in the identification of metal–metal charge transfer bands in clusters of clusters 29
Cobalt compound
A study of valence level photoelectron cross sections for the metallocenes of vanadium, chromium, cobalt and nickel from 20 to 100 eV 101
Copper
Surface reactions of NO_2 with machined Zn, Cd, Cu and Ag surfaces studied by He I/II photoelectron spectroscopy 167
Core level
Alkaline earth core level photoemission spectroscopy of high temperature superconductors 241
Nd-Ce-Cu-O valence band photoemission measurements 387
Surface termination of $YBa_2Cu_3O_{7-x}$ systems 453
The Cu2p X-ray photoelectron core-lines in copper oxide based high temperature superconductors 223
The problem with the copper Auger data for the high temperature superconductors 269

Dichlorodifluoromethane
High resolution photoelectron spectroscopy of CH_2F_2, CH_2Cl_2 and CF_2Cl_2 using supersonic molecular beams 125
Dichloromethane
High resolution photoelectron spectroscopy of CH_2F_2, CH_2Cl_2 and CF_2Cl_2 using supersonic molecular beams 125
Difluoromethane
High resolution photoelectron spectroscopy of CH_2F_2, CH_2Cl_2 and CF_2Cl_2 using supersonic molecular beams 125
Disorder
Alkaline earth core level photoemission spectroscopy of high temperature superconductors 241
Disulphoxide
Photoelectron spectroscopy: the early days 11
Doping
Electron energy-loss and X-ray absorption spectroscopy of cuprate superconductors and related compounds 395
Nd-Ce-Cu-O valence band photoemission measurements 387
Photoemission studies of Bi–Sr–Ca–Cu–O valence band 359

EELS
Electron energy-loss and X-ray absorption spectroscopy of cuprate superconductors and related compounds 395

EMS
The complete valence shell photoelectron spectra of CH_3F, CH_3Cl, and CH_3Br using synchrotron radiation at $h\nu = 72$ eV: a comparison with many-body Green's function calculations 83

Fermi edge
Intrinsic photoemission signals, surface preparation, and surface stability of high temperature superconductors 209
Nd-Ce-Cu-O valence band photoemission measurements 387
Fermi surface
Electronic band structure of high T_c Cu-oxide superconductors: comparison of predictions with experiments 281
Photoemission studies of the valence bands in $YBa_2Cu_3O_{7-\delta}$ 321
Fluorine
A study of the reactions of chlorine and fluorine atoms with SiH_2Cl_2 and $SiHCl_3$, with ultraviolet photoelectron spectroscopy 175
Fluoromethane
The complete valence shell photoelectron spectra of CH_3F, CH_3Cl, and CH_3Br using synchrotron radiation at $h\nu = 72$ eV: a comparison with many-body Green's function calculations 83

Group IIa
Alkaline earth core level photoemission spectroscopy of high temperature superconductors 241
Rare-earth valence in the high-T_c and related oxides studied by photoelectron and X-ray absorption spectroscopies 257
Group V
Photoionization of Group V trimers and tetramers 399

Historical
ORBITALS (1992) 1
Photoelectron spectroscopy at Oxford, 1970–71 25
Photoelectron spectroscopy of transient species – a historical perspective 37
Photoelectron spectroscopy: the early days 11
Spectroscopic characterization of cations: from photoelectron spectroscopy to laser and ion-beam methods 15
Threshold photoionization and ZEKE spectroscopy: a historical perspective 139
UPS at the beginning 3

HTSC
Alkaline earth core level photoemission spectroscopy of high temperature superconductors 241
Electron energy-loss and X-ray absorption spectroscopy of cuprate superconductors and related compounds 395
Electronic band structure of high T_c Cu-oxide superconductors: comparison of predictions with experiments 281
Electronic band structures in cubic perovskite-type oxides: bismuthates and transition metal oxides 303
Intrinsic photoemission signals, surface preparation, and surface stability of high temperature superconductors 209
Nd-Ce-Cu-O valence band photoemission measurements 387
Photoemission studies of the Bi–Sr–Ca–Cu–O valence band 359
Photoemission studies of the valance bands in $YBa_2Cu_3O_{7-\delta}$ 321
Rare-earth valence in the high-T_c and related oxides studied by photoelectron and X-ray absorption spectroscopies 257
Surface termination of $YBa_2Cu_3O_{7-x}$ systems 453
The Cu2p X-ray photoelectron core-lines in copper oxide based high temperature superconductors 223
The problem with the copper Auger data for the high temperature superconductors 269

Lanthanon compound
Rare-earth valence in the high-T_c and related oxides studied by photoelectron and X-ray absorption spectroscopies 257
LDF
Electronic band structure of high T_c Cu-oxide superconductors: comparison of predictions with experiments 281
LEED
Surface termination of $YBa_2Cu_3O_{7-x}$ systems 453

Magic angle
A primer of valence shell photoelectron angular distributions in atoms 117
Mechanism
The problem with the copper Auger data for the high temperature superconductors 269
Metallocene
A study of valence level photoelectron cross sections for the metallocenes of vanadium, chromium, cobalt and nickel from 20 to 100 eV 101
Methyl halide
High resolution photoelectron spectroscopy of CH_2F_2, CH_2Cl_2 and CF_2Cl_2 using supersonic molecular beams 125
The complete valence shell photoelectron spectra of CH_3F, CH_3Cl, and CH_3Br using synchrotron radiation at $h\nu = 72$ eV: a comparison with many-body Green's function calculations 83
Model
Alkaline earth core level photoemission spectroscopy of high temperature superconductors 241
Electron energy-loss and X-ray absorption spectroscopy of cuprate superconductors and related compounds 395
The Cu2p X-ray photoelectron core-lines in copper oxide based high temperature superconductors 223

Nickel compound
A study of valence level photoelectron cross sections for the metallocenes of vanadium, chromium, cobalt and nickel from 20 to 100 eV 101
Nitrogen
Intensity perturbations in the $v^+ = 2$, 1 and 0 bands of the zero-kinetic-energy (ZEKE) photoelectron spectrum of N_2 151
Nitrogen oxide
Surface reactions of NO_2 with machined Zn, Cd, Cu and Ag surfaces studied by He I/II photoelectron spectroscopy 167
Nitrone
Photoelectron spectroscopy: the early days 11

PES
A primer of valence shell photoelectron angular distributions in atoms 117
A study of valence level photoelectron cross sections for the metallocenes of vanadium, chromium, cobalt and nickel from 20 to 100 eV 101
Autoionization of doubly excited Ar atoms into Ar^{2+} and Ar^+ continuum states 75
High resolution He I photoelectron spectrum of acrylonitrile 65
High resolution photoelectron spectroscopy of CH_2F_2, CH_2Cl_2 and CF_2Cl_2 using supersonic molecular beams 125
On the role of PES data in the identification of metal–metal charge transfer bands in clusters of clusters 29
Photoelectron spectroscopy at Oxford, 1970–71 25
Photoelectron spectroscopy of transient species – a historical perspective 37
Photoelectron spectroscopy: the early days 11
Photoemission studies of the Bi–Sr–Ca–Cu–O valence band 359

Photoemission studies of the valence bands in $YBa_2Cu_3O_{7-\delta}$ 321
Rare-earth valence in the high-T_c and related oxides studied by photoelectron and X-ray absorption spectroscopies 257
Spectroscopic characterization of cations: from photoelectron spectroscopy to laser and ion-beam methods 15
Surface reactions of NO_2 with machined Zn, Cd, Cu and Ag surfaces studied by He I/II photoelectron spectroscopy 167
The complete valence shell photoelectron spectra of CH_3F, CH_3Cl, and CH_3Br using synchrotron radiation at $h\nu = 72$ eV: a comparison with many-body Green's function calculations 83
Threshold photoionization and ZEKE spectroscopy: a historical prspective 139
Ultraviolet photoelectron spectra of arene chromium tricarbonyls 55
PESM
A performance and applications study of the photoelectron spectromicroscope 189
Perovskite
Electronic band structures in cubic perovskite-type oxides: bismuthates and transition metal oxides 303
Photoionization
Photoionization of Group V trimers and tetramers 39
PIES
Autoionization of doubly excited Ar atoms into Ar^{2+} and Ar^+ continuum states 75
High resolution He I photoelectron spectrum of acrylonitrile 65
PIMS
Photoionization of Group V trimers and tetramers 39

RPS
Nd-Ce-Cu-O valence band photoemission measurements 387

Satellite
Photoemission studies of the Bi–Sr–Ca–Cu–O valence band 359
The problem with the copper Auger data for the high temperature superconductors 269
Silicon compound
A study of the reactions of chlorine and fluorine atoms with SiH_2Cl_2 and $SiHCl_3$, with ultraviolet photoelectron spectroscopy 175
Silver
Surface reactions of NO_2 with machined Zn, Cd, Cu and Ag surfaces studied by He I/II photoelectron spectroscopy 167
Spectromicroscope
A performance and applications study of the photoelectron spectromicroscope 189
Surface stability
Intrinsic photoemission signals, surface preparation, and surface stability of high temperature superconductors 209

Termination
Surface termination of $YBa_2Cu_3O_{7-x}$ systems 453
Tetramer
Photoionization of Group V trimers and tetramers 39
Thin film
The Cu2p X-ray photoelectron core-lines in copper oxide based high temperature superconductors 223
Transition metal oxide
Electronic band structures in cubic perovskite-type oxides: bismuthates and transition metal oxides 303
Trimer
Photoionization of Group V trimers and tetramers 39

UPS
A study of the reactions of chlorine and fluorine atoms with SiH_2Cl_2 and $SiHCl_3$, with ultraviolet photoelectron spectroscopy 175
Photoelectron spectroscopy at Oxford, 1970–71 25
Spectroscopic characterization of cations: from photoelectron spectroscopy to laser and ion-beam methods 15
Ultraviolet photoelectron spectra of arene chromium tricarbonyls 55
UPS at the beginning 3
UV–visible
On the role of PES data in the identification of metal–metal charge transfer bands in clusters of clusters 29

Valence
Photoemission studies of the valence bands in $YBa_2Cu_3O_{7-\delta}$ 321
Rare-earth valence in the high-T_c and related oxides studied by photoelectron and X-ray absorption spectroscopies 257
Valence band
Nd-Ce-Cu-O valence band photoemission measurements 387

Vanadium compound
A study of valence level photoelectron cross sections for the metallocenes of vanadium, chromium, cobalt and nickel from 20 to 100 eV 101

XAS
Electron energy-loss and X-ray absorption spectroscopy of cuprate superconductors and related compounds 395
Rare-earth valence in the high-T_c and related oxides studied by photoelectron and X-ray absorption spectroscopies 257

XPS
The Cu2p X-ray photoelectron core-lines in copper oxide based high temperature superconductors 223
The problem with the copper Auger data for the high temperature superconductors 269

XUV
Intensity perturbations in the $v^+ = 2$, 1 and 0 bands of the zero-kinetic-energy (ZEKE) photoelectron spectrum of N_2 151

ZEKE
Inensity perturbations in the $v^+ = 2$, 1 and 0 bands of the zero-kinetic-energy (ZEKE) photoelectron spectrum of N_2 151
Threshold photoionization and ZEKE spectroscopy: a historical perspective 139

Zinc
Surface reactions of NO_2 with machined Zn, Cd, Cu and Ag surfaces studied by He I/II photoelectron spectroscopy 167
